

Arruti designs and manufactures mechanical, compression and welded connectors for transmission, power substation and distribution systems for application in grounding, distribution, transmission and substations with capacities up to 500KV.

Defender Plastics manufactures BOLO™ Corner Guard, a first-of-its-kind, all-in-one utility box pad protection system that reduces the amount of time and money spent repairing or replacing damaged pads and partially buried fiberglass utility infrastructure.

King Luminaire manufactures decorative outdoor lighting products for a vast array of applications. From park lighting, streetlighting, new home development to utility, King Luminaire has supplied thousands of luminaires throughout north America and the world with original Circa 1920 designs, to state of the art optical systems. King Luminaire can help design and supply outdoor lighting products for most applications including decorative spun concrete, metal, aluminum and cast iron poles along with bases, arms and banners.

Panel Built manufactures a complete line of custom modular substation buildings, security booths, pre-assembled buildings, ballistic rated guard houses, prefabricated towers, offices, mezzanines, cleanrooms, and other modular structures.

Pelco Structural Transmission, Substation, Distribution tapered tubular steel structure for applications up to 765kV, They pre-fit multi section structure before they ship to ensure accuracy. Offers temporary Emergency Transmission structures for fast installation that fits most application during any emergency needs. Made in the USA.

Phasor360 offers consulting and training services for the electric utility industry on Grounding, Metering, AMI, VAR Mitigation and SCADA. They build SME, PME, Cap-Banks, Sectionalizers and other custom OEM equipment. Disabled-VET Owned-USA Assembled

Priority Wire is a premier supplier of transmission, distribution, substation and building wire and cable. Aluminum SER, SEU, XHHW, 600 Volt UD, Service Drop, ACSR, AAC, AAAC, ACSS, MV Cable, Bare Cu, Control cable, Guy Wire, Aluminum Clad, Airport Lighting, Portable Cord, Type W, G, G-GC, SHD-GC, DLO, Welding Cable, MC Cable, Category Cables (3, 5E, 6), Coaxial Cables, Electronics Cables, Ground Rods and Accessories.

Radian Research, Inc. is a recognized world leader of Energy Reference Standards, Energy Meter Testing Systems, Current Transformer Testers, Meter Test Boards, DC to AC Transfer Standards, and Automated Laboratory Energy Reference Systems. They provide both portable and primary energy reference standards that are absolutely unequalled in accuracy, stability and reliability.

Reinhausen manufactures high-quality products such as on-load tap-changers and de-energized tap-changers, innovative sensors, automation technology and analytics, as well as an increasing number of digital solutions.

Safegrid is a simplified and scalable fault monitoring solution for electric transmission and distribution grids. Their solution enables fault location within +/- 100 meter accuracy on a map in just seconds and predictive maintenance is based on 24/7/365 partial discharge detection. With proprietary algorithms, the system classifies grid events by type and severity, enabling customers to identify faults, anticipate future issues, and prevent them.

SPS Manufactures Low voltage switchgear and switchboards, medium voltage metal-enclosed and metal-clad switchgear, low and medium voltage arc-resistant switchgear, metal-enclosed power capacitor banks and harmonic filter banks, PME enclosures, relay panels, skids, and e-house (PDC, PCR, EER, IPA, PCC) buildings. WBENC -Made in the USA.

High Quality Spun Concrete Poles, power distribution and transmission poles as well as a line of specialty poles that are suited for camera and solar applications.

Transmission & Distribution Services, LLC is a cost-effective leak seal solution to re-gasketing equipment for oil, nitrogen and SF6 leaks. Leak repairs on Transformers, Circuit Breakers, and Cable. Oil and gas leak detection and control programs.

Wagners uniquely pultruded Fiber Reinforced Polymer (FRP) utility poles are safer than traditional poles because they do not conduct electricity thereby reducing risk associated with shock or electrocution, especially during installation. FRP utility poles are extremely durable with an expected 80-year design life. Additionally, Wagners utility poles are inert which means they will not react chemically to their surroundings making them resistant to rot, rust and corrosion caused by moisture, chemicals and UV radiation. Made in the USA
